

St. Aidan's Church of England Primary School

Spirituality within the Curriculum

Computing

Spirituality weaves through every aspect of life at St. Aidan's, permeating our vision, culture, and daily practices. Our pupils have enquiring minds and want to learn about themselves, others and the world.

Through our ambitious and broad curriculum, children have opportunities to ignite their interests and talents. Rich spiritual opportunities exist across the computing curriculum for all children at every age.

Spirituality can manifest through computing as our pupils engage in the exploration of technology with a mindful and reflective approach. Through activities such as coding, digital storytelling, interactive simulations and creating videos, our children can express their imaginative and spiritual dimensions. Computing lessons may encourage contemplation on the ethical use of technology, fostering a sense of responsibility and mindfulness in the digital realm. Additionally, collaborative projects and discussions about the impact of technology on society provide opportunities for our children to reflect on their values and connections to the broader world. As our children navigate the digital landscape, they can develop a rounded understanding of spirituality that encompasses both the tangible and virtual aspects of their lives, fostering a balanced and thoughtful approach to technology.

The computing curriculum has been designed with many opportunities for spiritual development in mind.

- The wonder of worldwide instant communication.
- The speed of the growth of knowledge.
- The accessibility of knowledge and contact with other people worldwide.
